Dear Ellyn -

We have been in our new home for over a year now, and it's been a thought of mine to send you a note of appreciation, because I think of you often - every time I open a closet! 😊 -

When we began to build our house, I had some specific ideas about the design of the home, the kinds of rooms - lots of "big picture" things. BUT, when it came to the small (perse) details like kitchen cabinet design or closet construction - I came to the project with no pre-conceived ideas or preferences. Thankfully, you were able to guide my husband + I through the process expertly.

Our meeting with you occurred close to the end of the home-building project, at a time when I was so weary of making decisions - we had already made so many!

You made several suggestions and recommendations that I can report were "right on target" for our needs + preferences. And I'm so glad we took your advice.

An example: I am using a spare bedroom as my office, and I had a wall of closets to outfit. At first I thought I should build the closets for this room to hang clothes - even tho' I wouldn't be using it for this purpose. You said I should build the closet for "now" -

So I built lots of shelves to hold all my office supplies, paraphanelia, etc. Boy, am I glad I did! I'm running out of room, so I'll close now, but I did  want to let you know I appreciate ~~Hallmark~~ the expertise you offered us - keep up the good work!

Sincerely,

Nature's
