

Ask The Closet Lady[®]

Ellyn Gellar-Elstein

Q: Dear Closet Lady,
We are converting a bedroom to a closet room. Do you have any ideas on how to work around the windows?

Lindsey
Allentown, PA

A: Lindsey, first it is important to coat the window to protect your clothes from the UV rays. Secondly, it is important to build storage units surrounding the window. A great idea for under the sill is slanted shoe shelves. Feel free to give us a call. We'd be glad to help you with your closet. Thank you for your question!
