"Fishing is much more than fish. It is the great occasion when we may return to the fine simplicity of our forefathers."

~ Herbert Hoover

Tackling the Challenges of Fishing

"Gone fishing" is the sign every fishing enthusiast plans to leave in their wake this summer. However, before leaving, the challenge of getting all of the supplies and equipment together in a systemized manner can be overwhelming.

Storing and maintaining fishing gear is a delicate issue, literally. You invest a lot of money you're your hobby and you take great pride in having top performing equipment. Also, depending on the type of fisher you are, you may even have different kinds of equipment. From the fishing rods, to the line, to the various baits, finding the

right place and storage options are a challenge. There are several options available that will greatly improve the time you spend storing rather than fishing. At Creative Closets, we

represent

several companies who make terrific

specialty

organizers for all types of fishing equipment. Hanging areas for chest waders as well as rod cases, rod holders, reels, and tackle boxes are just a few ways to make storing fishing equipment easier.

Refashioning vacation homes for optimal function and aesthetics is just one of our many specialties. Creative Closets can service clients over an hour radius of Allentown, PA. Contact us to explore solutions today, or visit our web site at creativeclosets.com

Get it Together-Optimize Camper & RV Storage

There are many things to consider when creating optimal living and storage space for RV and camper travel, and safety comes first.

Secure and mount...Items that are not secured may take flight while on the road. Consider how best to secure loose items. Heavy items should be stored in bottom cabinets, and fragile items secured in bins. Wall mounting some items, such as fire extinguishers, is another way to optimize space and ease of use.

Space...Do not over-pack! Given today's gas prices, aim to cut your

fuel budget by cutting down on the weight of your camping gear. There simply isn't enough room to reproduce your kitchen. Create an RV/Camper checklist. Begin by writing down what essential items you use in your kitchen in a given week. As you use an item, like an appliance or kitchen tool, add it to the list. You may find you use just a handful of necessary items. Think "easy to wash and light weight."

Once you have narrowed down the kitchen tools, the same list structure can be done with food and

other necessary items.

How does your water work? How will you keep your food at the correct temperature? These are just a few other things to consider.

Finally, purge. After a few trips, revisit and reevaluate all of your cabinets. Remove all old and unnecessary items.

Our team has prepared several RVs for our clients. Whether the journey is cross-country or a quick weekend get-away, determining a plan to outfit this non-traditional space is key.

Ellyn G. Elstein, *The Closet*

Quality products and quality installation is what you will find at Creative Closets. We don't simply provide storage solutions; we deliver exceptional service from concept to installation.

Servicing Eastern Pennsylvania and North and Central New Jersey since 1983, Creative Closets organizes homeowners and businesses for optimal efficiency tailored to specific needs. Our award-winning, custom-designed and custom-built organizational systems are installed with

the utmost care. Customers know how long we'll be in their space, with no interruptions – when we start installation; we stay on the job until it is completed. Our installers even wear booties on-site and don't leave behind a construction mess.

Our overall precision and meticulous attention to details sets us apart from our competition. Visit our showroom today for more information.
